

PINO PREMIO

Thermally modified, elegant, clear

SWM WOOD

THERMALLY MODIFIED, KNOTLESS MATERIAL FOR YOUR INTERIOR DECORATION

Pino Premio is an elegant, soft-coloured, comfortable material for interior decoration, especially suitable for bathrooms and saunas. The treatment class Thermo-D can also be used as outdoor cladding.

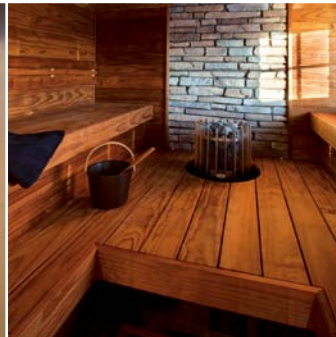

Pino Premio product concept:

- Panelling in different sizes
- Material for sauna benches in different widths
- Mouldings for the finishing touch

Available in Thermowood® **Thermo-D** and **Thermo-S** treatment classes.

Key facts:

- knotless material
- especially suitable for use in bathrooms and saunas
- excellent dimensional and form stability
- consistent colour throughout the product
- resin removed
- reduced thermal conductivity

Thermowood® is an environmentally friendly product which can be disposed of for example by burning. Used raw material comes from sustainably managed forests and is either PEFC or FSC certified.

SWM-Wood

Excellence in thermal wood modification

SWM-Wood is one of the leading Finnish manufacturers of thermally modified wood. The product portfolio includes thermally modified wood products for interior decoration, terrace and garden building and exterior cladding.

Main part of the production is exported, SWM Thermowood® is available in over 10 countries.
